EASY RESCUE

BUDDY - *Easy Rescue Tactical Stretcher*

BUDDY - Easy Rescue is a new and innovative solution that effectively resolves typical mobilization challenges in emergency situations. Convenient and highly portable, this handy evacuation tool is ideal for military and security personnel, field exercises, search and rescue teams, school outings, treks, sport teams and more. Compact and lightweight, BUDDY is the best choice for transporting the injured, disabled or handicapped from inconvenient locations in the home or field, even in emergencies.

BUDDY - Easy Rescue Tactical Stretcher

FEATURES & BENEFITS

The BUDDY - Easy Rescue Tactical Stretcher is a 2-person hands-free patient transfer system that can be taken anywhere due to its lightweight fabric and sturdy plastic. The BUDDY - Easy Rescue is a handy alternative to stretchers or evacuation chair. It goes where no stretcher can go such as stairways, hillsides, gullies, ravines, canes and caverns, for example, and allows only two evacuators to carry up to 350 lb out of any tight spot. The Easy Rescue unique design allows for "hands-free" transport, providing evacuators full use of their hands for climbing, balancing, self-defense or for carrying other items such as rope, medical or first aid kits, and other supplies as they complete the evacuation.

APPLICATION

Evacuation and Rescue

BUDDY is a convenient evacuation harness that resolves typical evacuation challenges such as limited manpower or limited access.

Military

BUDDY is a tactical stretcher that effectively enables military personnel to evacuate the injured while still remaining operational. BUDDY's unique design overcomes the challenges of limited manpower or difficult access, frequent in deployments.

Safety

BUDDY effectively resolves mobilization challenges for the elderly, injured and the disabled.

- Campgrounds
- First Responders
- School Trips
- Stadium Sports
- EMS
- Military Combat
- Search and Rescue
- Tactical Training
